IN THE VALLEY

Today when the sun was lighting my house on the pine clad hill.

The breast of a bird was ruffled as it perched on my window sill.

And a leaf was chased by the kitten on the breeze swept garden walk. And the dainty head

Of a dahlia red Was stirred on its slender stalk.

Ohl happy the bird at the rose tree, unheeding the threatening storm! And happy the blithe leaf chaser, rejoicing in sunshine warm! They take no thought for the morrow—they

know no cares today;
And the thousand things That the future brings Are a blank to such as they.

But I, by the household ingle, can interpret the looming clouds,

For the wind "soohoos" through the keyhole,
and a shadow the house enshrouds; And I know I must quit my mountain, and go down to the vale below,

For my house is chill On the windy hill, When the autumn tempests blow.

My mind is forever drawing an instructive par-Twist temporal things that perish and eternal things that dwell-When billows and waves surround me, and waters no soul o'erflow,

I descend in hope From the mountain top

To the sheltering vale below. I go down to the Valley of Silence, where the of his success lay in his personality. worldly are never met; I know there is "baim and healing" there for eyes that with tears are wet; And I find in its sweet seclusion gentle solace

for all my care,

For that valley pure,

With its shelter sure,
is the beautiful Vale of Frayer. Nannie Power-O'Donoghue in Chambers

Nonmagnetized Watches.

It is very seldom that a watch will be affected when worn in an electric car, because the electrical current does not come in clos proximity to the wearer, or both might feel its efcould be affected. These watches, which are largely in the majority, are supplied with works of fine steel, and an electric current, when brought to bear on it, finds its center of attraction in the roller and lever or under the balance wheel. On that disk are two tiny posts which fit in The pole is the flat piece of steel which moves backward and forward balance wheel. The pole attracts the electric current. A magnet .. loadillustration. Watches are manufactured which are proof against such currents. They are magnetized. That is done by substituting a composition pole and roller.-Brooklyn

His Consolation There was a backward student at Balliol who, for failure to pass an examination in Greek, was "sent down." His mother went to see the master. Dr. Jowett, and explained to him what an excellent lad her son was. "It is a hard experience for him, this disgrace," said the old lady, "but he will have the consolation of religion, and there is always one book to which he can turn." Jowett eyed her a moment and then answered, "Yes, madam—the Greek grammar. Good morning."-San Francisco Argonaut.

Famous correspondence between Goethe and Charlotte von Stein, from 1776 to 1826, numbering 1,348 letters, which are bound up in seven folio volumes, was recently offered for with the Riff Arabs, lies to the south sale in Berlin at the price of 200,000 marks.

A pessimist walking with his wife and meeting a whole school of girls said sorrowfully: "Heavens and earth! The poor men! What a crowd of future mothers in law."-Exchange.

The latest statistics prove that more than two-thirds of the grown male population of the globe use tobacco in some one of the many forms in which it is taken.

The Spaniards individually eat every year 500 pounds of bread, 48 of meat, 11 of fish, 12 of sugar and wash down this supply with 14 gallons of wine.

On Long Island duck farms are found to be more profitable than summer boarders.

Sir Andrew Clark's Methods,

One of the most difficult things a dector has to do, and one which in a suit now on trial in the United greatly influences his own fortunes States district court at Cincinnati. The the condition of a patient to the relatives. This task Sir Andrew Clark used to perform in a most masterly manner. Fluently and without the slightest hesitation, in simple but impressive language, he would lay out the whole case as clear as day, showing exactly what had happened, what might be expected to happen, what that purpose it was taken to Washingwas to be done, and why? Nothing ton and submitted to an expert photoggives people more comfort and satis rapher of that city. faction, and therefore nothing creablest men.

The importance attached by Sir Andrew to diet, and still more the minute instructions he would draw up on the subject, no doubt attracted the attention of patients as something of a novelty and contributed not a little to their respect for him, but this was one of his crotchets, and maybe he overdid it. The real secret of the land. - Indianapolis Journal.

Though there was nothing in his appearance to suggest the eminent physician of tradition or romance, whatever he said or did bore the stamp of a clear and vigorous brain, a self collected and superior mind. He always gave the impression of knowing what he was about, as indeed he did.-St. James Budget.

All Quiet on the Potomae.

heard during the war, and even now adays, is the one, "All's quiet on the fects. Nonmagnetized watches only Potomac tonight." It was in general use during the conflict of 1861-5, and was originated by John H. Fralick of the Metropolitan hotel, this city.

Mr. Fralick enlisted in the Thirty fourth New York volunteers. He was detached on an order of General pole of the watch. The roller is the Scott and made acting assistant sigsmall steel disk which fits directly nal officer, with headquarters on Maryland heights. His duty was to seud dispatches to the commander of the ends of the pole of the watch. the army and to communicate to him | Christmas. Let him ask and expect cash | rare occurrence in France, where silence secret information.

While stationed at the point stated, with the reversible motion of the on Aug. 15, 1861, Mr. Franck sent a written report to Captain Rawley showing the condition of the southstone held over it will give a good ern army on the Virginia side. The report was written at midnight, and Captain Fralick closed it with the asked for a dinner. It was given to him, words, "All's quiet along the Poto-

He Could Do It.

change.

An exchange prints a story, probably fictitious, of an epistolary encounter between Charles Sumner and an impudent schoolboy.

The boy saw Mr. Sumner's frank on a public document, and being an autograph collector, sat down straightaway and wrote to him thus: By the aid of Webster's unabridged and the Greek and Latin lexicons, and with the assistance of my high school teacher, I have made this out to be your name. If that is so, and you can do it again, please do it for me.

The senator seems to have been amused by the saucy letter, for he replied as follows:

I am glad to learn that you have so many sible for any loss that may befall the helps to education. It was my name. I can bank in the handling of the money.—

Our York News.

A New Use For Photography. Photography played an important part by the way he does it, is to explain suit is one of long standing, involving the title to 1,500 acres of valuable farm lands. It is based on a deed made nearly 75 years ago by the owners of the land, months. and turns on the point whether the deed had five signatures or only four. In order to test this question it was decided to have the deed photographed, and the clerk of the court was ordered to give the matter his personal supervision. For

The original deed, discolored and yelates a more favorable impression low with age, showed traces of four sigthan this gift of explanation, which natures and a space where there might is often notoriously lacking in the have been a fifth, but no traces of it. The photographing was done in the presence of the clerk of the court, who refused to let the deed go out of his sight. The negative revealed traces of the missing signature, and when it was enlarged 10 times the entire name became as plain as when first written. The court pronounced the evidence conclusive, and the result will be the reversal of a former decision and a change in the ownership

Gone Into Trade.

There was a rush of dudes the other day to see how Rawlie Cottenet looked selling flowers over a counter. Had Mrs. Paran Stevens set up a shop for lollypops or McAllister opened an "art gallery" on Fifth avenue society couldn't have been more excited than to hear that a nephew of Mrs. William Astor had actually gone into retail trade on a fashionable thoroughfare. And when the dudes got there, what did they see but a very One of the favorite expressions earnest, quiet and self possessed young man ready to sell them flowers at reasonable prices for cash down on the nail.

It is not so long ago that Klunder had all the fashionable trade for roses and violets in town. He was a confiding little German, who was fairly dazzled by the brilliancy of the dudes and the splendor of the carriages that stopped at his door. In time he "bust" as high as a kite, and all his assets were some \$50,000 of uncollectable bills from the belles and beaux of New York.

Cooking Inferior Steak.

To cook an inferior steak, such as side is well seared, then add a small cuprul of boiling water, slice an onion over the top, put on a snug lid and let simmer very gently for half an hour longer if meat is still tough. This makes a most savory dish and goes finely with mashed potatoes. I prefer to use suct in cooking steaks, as it imparts the finest flavor .-

Exchange, A Grand Army Exchange. Grand Army men in New York have organized a mission the purpose of which is to cash the checks of pensioners se as to avoid the "accommodation" they have heretofore received from saloon keepers and warrant shavers. Colonel James, a national bank president, sent \$100,000 in cash to the mission on check day and veterans called there and got their money without deduction or expense. General Swayne, General Alexander Webb, Colonel Killian Van Renselaer, Colonel Hoadley and others made themselves responsible for any loss that may befall the Pawnshops For the Pour.

There will soon be a strong rival to all the professional "uncles" in this city. The People's Bank association, a newly formed organization for rescuing the poor from the clutches of grasping pawnbrokers, promises to open at least one pawnshop in New York within a few

Alfred Bishop Mason, a member of the firm of Sprague, Duncan & Hutchison limited, of 15 Wall street and a trustee of the Charity Organization society, has been the chief mover in forming the People's Bank association. He promises to open the main office of the concern with in a few weeks at furthest. Then a pawn shop branch will be initiated in som part of the city where tenements and poverty are plentiful. The chief object will be to lend money at a low rate interest on clothing and household good

"We intend to charge only 1 per cen per month interest," said a promoter o the scheme to me. "Ordinary pawnbrokers charge 3 per cent for the firs month and 2 per cent a month for all after that. Our scheme will be to charge a little as possible for the accommodation Our capital will be \$100,000. A limited number of shares will be sold at \$10 each, with the distinct understanding that dividends shall never exceed 4 per cent a year, all profits above that being added to the general fund for extending the people's banks."-New York Herald.

Don't Know President Carnot. It will be very difficult for M. Carnot to manage constituent elements of the force to be controlled, and he certainly is not managing them successfully now. They are growing impatient of the mediocre men he favors, perhaps a little ashamed of them, and there is a dispo sition in consequence to fasten responsi bility on him personally in a manner quite new. If he persists in his plan, we may see "surprises," as M. de Blowitz recently said, which will tax to the utmost the president's popularity and furnish a final test of a character still ex-

ceedingly obscure. M. Carnot has reigned for six years and is not well known yet. And when that happens in such a place as Paris to a man in such a position there are usually only two explanations of the fact that entire loss of faith." are worth consideration. The atmosphere of stellar space is the subject of a learned article in Science, in which the writer argues that the process of dissipating into space may be prevented—among other causes—by the fact that the planets are continually sweeping through the interplanetary space where the escaped particles caused by such movements are so active, and even if the density of this interplanetary atmosphere be only a millionth of a millionth of the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the density of the acertly such movements are so active, and even if the condition of yours? Is your hair dry, harsh, brittle? Does it split at the ends? Has it a lifetes appearance? Does it fall out when combed or brushed? Is it full of dandruff? Does your scale it is it dry or in a heated condition? If these are some of your symptoms be warned in time or you will become bald. lionth of the density of the earth's surface still there will be at least a million particles in each cubic centimeter, and some of them will get swept up by the planets in their course and will not get away again,

Such being the case, it is argued by this writer that the process of dissipation will cease when a planet picks up in its course through space just as many as it loses by diffusion in the same time, and it follows from this that there must exist in planetary space an atmosphere which, though greatly reduced in density, is of the same chemical constitution as the earth's atmosphere-that is, having the same chemical constituents, though not quite in the same proportions, for the average velocity of the particles of nitrogen is a trifle greater than that of the particles of oxygen, and so the former escape into space rather more frequently in proportion to their numbers than the latter-the effect, too, of gravity being to increase slightly the proportion of oxygen to nitrogen in the lower strata of the atmosphere.

The Latest Style of Liss, Here is a kiss, described upon feminine authority as the latest, which the Chio board of health or any other aggregation of sanitary wiseacres can prohibit in the interest of the general health. It is executed by laying the left cheeks to-

ether and letting the smack go uninter-

cupted into space. - Detroit Free Press. The Affectation of Skepticism. Cardinal Gibbons recently expressed himself in this way, "Young men who have received an imperfect and superficial education want to appear wise and Larned and think in order to do so they must affect a degree of skepticism an infidelity which frequently results in all
